Reduce the risk of stoma closures

ENPLUG’s are designed for emergency use to keep stomas from closing when a gastrostomy device has fallen out.

The ENPLUG packs are available in 2 different lengths and various French sizes in case the stoma has already started to close and the currently used French size does not fit the stoma anymore.

How to use the ENPLUG

• Each ENPLUG has the French size moulded on the top of the disk.
• Every ENPLUG French size has its unique colour.

10Fr 12Fr 14Fr 16Fr 18Fr 20Fr

• The first ENPLUG inserted should be the same French size as the current gastrostomy. Gently try to insert the tapered tip into the existing tract (use water-based lubrication if required).
• If the stoma has already started to close try to insert the next smaller ENPLUG continue until a suitable ENPLUG has been inserted.
• Tape the ENPLUG in place and arrange for gastrostomy replacement.
• ENPLUGs can be reused* on the same patient.
  *If the device has been appropriately cleaned
